

## Seminar on **Opportunities in Defence & Aerospace for the Industry**

The Ministry of Defence has taken some important policy initiatives in the recent years, to position India as an emerging manufacturing hub. Several changes have been made to procure new platforms and to sustain the existing equipment to ensure operational capability of the Indian Armed Forces. These initiatives have paved the way for creation of a robust defence manufacturing ecosystem in the country and promote the entire spectrum of large, medium & small industries.

With due focus on higher level of indigenisation, opportunities in the defence sector are immense. The opportunities could come through meeting the requirements of Capital and Revenue procurements. A major source of opportunity, especially for the MSMEs in defence and aerospace, also comes in the form of being integrated into the supply chain of the business outsourced by large Indian OEMs from public and private sector, Ordnance Factories and Foreign OEMs.

Telangana, has the benefit of having a strong presence of Armed Forces Academic Institutions, public and private sector in defence and aerospace. With several multinationals and domestic companies setting up manufacturing facilities to make key defence, aerospace and naval components and systems, the state is well poised to play a key role in linking and supporting the new defence corridors announced in the Budget 2018.

Society of Indian Defence Manufacturers and Confederation of Indian Industry are organising a Seminar on **“Opportunities in Defence & Aerospace for the Industry “ on 22 June 2018 at NI-MSME, Yousufguda, Hyderabad, Telangana.**

The Hon'ble Raksha Rajya Mantri, Dr Subhash Ramrao Bhamre has to be the 'Chief Guest' of the seminar and will deliver the Inaugural Address.

The seminar will serve as an important platform to bring together key stakeholders- Government officials, senior representatives of the three Services, DRDO, Defence PSUs, and private Industry, to deliberate on opportunities in defence and aerospace, across the spectrum of large, medium & small industries and galvanise business engagements.
